

Computing Code of Conduct

This code of conduct applies at all times both in and out of lesson, whilst using school equipment.

Our school has laptops and iPads which are connected to the internet to help with our learning, so there are times when I will access the internet in school.

1. I will only use computers / the internet for work that has been set by staff in school.
2. I will only visit sites that are suitable and that I have been asked to visit by an adult.

3. I will respect the school's ICT equipment at all times.
4. I will only open and save files in the class folder on the computers, unless I am told otherwise by a member of staff.
5. I will keep my school passwords (TTRockstars and Edshed) safe and I will not save them on to the laptops and iPads.

6. If I see something I know I shouldn't, or if I see something that worries me, I will close my laptop or lock my iPad screen and I will tell a member of staff straight away.
7. I will always talk to a trusted adult if I am worried about something online.
8. I will not 'follow' or ask a member of staff to be my 'friend' on social media sites.
